

ZAKARIA SISU

Software Developer · Founder · Web3 & AI Engineer

Ghana (Remote Worldwide) | zakariasisu5@gmail.com | +233 555 212 491 | github.com/Zakariasisu5 | linkedin.com/in/zakaria-sisu

SUMMARY

Full-stack developer and founder building production-grade web, Web3, and AI products from first idea to shipped release. Experience spans React/TypeScript frontends, Node.js/FastAPI backends, Solana and Sui smart contracts, and LLM-powered features. Currently leading engineering at 8nova and building CredLayer, an AI-driven wallet reputation platform for Web3.

EXPERIENCE

- Chief Technology Officer — 8nova

Current · Part-time

 - Own technical strategy, product architecture, and engineering delivery across the frontend and backend of the product.
 - Make stack and system-design decisions and coordinate technical execution from concept through delivery.
- Founder & CEO — CredLayer

Current

 - Building an AI-powered Web3 wallet reputation and trust-scoring platform on a React/TypeScript, FastAPI, and PostgreSQL/Redis stack with a Python scoring engine and Rust/Anchor Solana smart contracts.
 - Wrote engineering specifications across backend/AI, blockchain, and frontend workstreams, and drafted founder-market-fit and investor materials.
- Co-Founder — MoonCreditFi

60% Equity

 - Co-founded a decentralized lending protocol on the Sui blockchain with co-founder Sal Kuyateh.
 - Reviewed and fixed the Move smart contract codebase across six modules, resolving overflow, underflow, double-spend, and accounting vulnerabilities.
- Frontend Developer — ZenAI Automation

 - Built and maintained React/TypeScript interfaces for AI-powered automation tooling.
- Frontend Developer Intern — Hackerboost

 - Developed responsive frontend features and collaborated with the team on shipped product interfaces.

SELECTED PROJECTS

- CredLayer — AI-powered Web3 reputation & trust-scoring infrastructure

 - Scores wallet trust using on-chain history; built the AI scoring engine, Solana smart contracts, and product frontend.
- Confnect — AI-powered networking & scheduling platform

 - Built real-time chat, meeting scheduling, and profile management features with AI-driven connection insights.
- Billify Generator — Multi-currency invoice & billing SaaS

 - Built an invoice generator supporting multiple currencies and customizable templates, focused on active-user growth.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Angular, Tailwind CSS, Framer Motion, Vite
Backend: Node.js, Express.js, Python, FastAPI, PostgreSQL, Prisma, Redis, REST APIs
Web3 / Blockchain: Solana, Rust, Sui, Move, Smart Contracts, Wallet Integrations, Helius, QuickNode
AI: LLM Integrations, AI Agents, AI-Powered Applications, Machine Learning Integration
Infrastructure: Supabase, Firebase, Docker, GitHub Actions, Vercel, Railway, Cloudflare

EDUCATION

BSc Computer Science — University for Development Studies
GPA: 4.1
